

Summary:

Paper Bursting Strength Tester is fit for products which are packaged by corrugated paper such as electronic instruments, electric ware, hardwares, bike, valise, food, shoe, furniture etc, to test the bursting-resistance strength of paper box; it can also test cloth and synthetic leather.

The GT-7013-ADP type of bursting strength tester is adapted with signal output of pressure.

While specimen is breaking, the max. breaking value will be kept with the alarm buzzer & alert light automatically. Its Accuracy has promoted 20 times more than the traditional gauge.

NEWGOER TEST EQUIPMENT

Your Lab Consultant

NG-601 Bursting Strength Testing Machine

Standards:

*JIS-L1004,L1018,L1031,K6328,P8131,P8112,ASTM-D2210,TAPPI T403,
ISO2759-2001, GB/T1539*

Features:

- Large touch screen controller
- Equipped with printer. Print the test result immediately.
- Clamping ring material is stainless steel. Durable, fine mechanical property, green product and corrosion resistance are much better than other material.
- The structure is specially designed and high precision of test results.
- The equipment is easy and quick operations.

Specifications:

Bursting strength range	250~5600kPa
Resolution	1 kPa
Accuracy	±0.5%FS
Pressure speed	170±10ml/min
Specimen clumping force	more than 690kPa
Clamping ring diameter	31.5mm
Power	AC220 V±10%,50Hz
Dimension	445×425×555mm
